

The South Coast Science Project's
2019 SUMMER INSTITUTE
ENVIRONMENTAL SCIENCE
FOR ELEMENTARY TEACHERS

Learn more about Environmental Science, share teaching strategies with your colleagues, participate in hands-on investigations, and walk away with ready to teach lessons for your classroom! All activities are aligned with the Next Generation Science Standards (NGSS) for ESS3: Earth and Human Activity, the Environmental Principles and Concepts (EP&Cs), the Science and Engineering Practices, and Crosscutting Concepts.

Teachers of all experience levels in science are invited to participate in this hands-on workshop!

July 29th – August 2nd from 8:00 am – 4:00 pm
Carpinteria Middle School

- Continental breakfast at 7:30 am, along with a lunch provided each day.
- Work with a conceptual flow diagram that illustrates how Environmental concepts connect and build from kindergarten through middle school.
- Participate in student-centered hands-on investigations ready to bring back into your classrooms, a minimum of one full lesson per grade level for grades K-6.
- Ideas and strategies to support EL students and integrate NGSS with the Common Core embedded throughout the workshop.
- Opportunity to purchase professional development units through UCSB.
- Follow-up support with mini-grants to try lessons during the 2019-2020 school year and e-mail contact with science specialists and teacher leaders for answers to your questions during the year.

Apply by April 30th – limited space available!
