

The South Coast Science Project's
SUMMER INSTITUTE
CHEMISTRY AND ENGINEERING
FOR ELEMENTARY TEACHERS

Learn more about chemistry and engineering, share teaching strategies with your colleagues, participate in hands-on investigations, and walk away with ready to teach lessons for your classroom! All activities are aligned with the Next Generation Science Standards (NGSS) for PS1: Matter and its Interactions and ETS1: Engineering Design.

Teachers of all experience levels in science are invited to participate in this hands-on workshop!

July 31st – August 4th, 8:30 am – 3:30 pm
Carpinteria Middle School

- Continental breakfast at 8:00 am, along with a lunch provided each day.
- Participate in student-centered hands-on investigations ready to bring back into your classrooms, a minimum of one full lesson per grade level.
- Learn how to use a conceptual flow to scaffold science lessons and units.
- Best practices for EL students and incorporating NGSS with the Common Core embedded throughout the workshop.
- Opportunity to purchase professional development units through UCSB.
- Follow-up support with one reunion day during the 2017-2018 school year and e-mail contact with science specialists and teacher leaders for answers to your questions during the year.
